

## Wall Pictures Added

On December 6, 2016, the respected Comrade **Kim Jong Un** visited a children's camp in Kangwon Province.

When he was told that the new general knowledge learning space consists of an ocean room, fine art room, computer room and mountain-climbing room, he said with pleasure that he wanted to see all of them.

Looking around the ocean room, he said: The visual aids drawn on the walls to show the looks and names of sea creatures are not good enough to give profound knowledge of them. In order to show the details of their biological features it would be better to make the teaching aids into wall pictures.

Accordingly, wall pictures suited to the characteristics of the children's camp and the preparedness of children were newly added to the general knowledge learning space.
